

Viettel Cyber Security Maturity Program – CSMP

About CSMP

In the process of digital transformation, there are several significant challenges that organizations face in terms of cyber security. A key hurdle is the shortage of qualified IT security personnel and the challenge of balancing cybersecurity costs with tangible returns on investment. Thus, collaborating with a partner throughout the development of a systematic cybersecurity investment strategy can facilitate overcoming challenges encountered during this process. Recognizing the challenge, Viettel Cyber Security (VCS) has developed the Viettel Cyber Security Maturity Program (CSMP) to support businesses in achieving comprehensive information security, promoting sustainable digital transformation.

- ▶ **Viettel Cyber Security Maturity Program** is an exclusive partner program that commits to provide comprehensive, long-lasting protection while addressing critical talent shortages and optimizing your security investments for the future.

Who is this program for?

The CSMP is designed for Vietnamese businesses of all sizes seeking comprehensive cybersecurity solutions and a long-term investment roadmap. Through CSMP, Viettel Cyber Security will become your dedicated cybersecurity partner in terms of sustainable strategy, ensuring long-term protection and unlocking exclusive benefits for your organization.

Key Benefits

01 Security Maturity Assessment Consulting

Assess the cyber security maturity level according to the international standard NIST Cyber Security Framework and advise on a long-term IT security roadmap

02 IT Security Training

Bridge the talent gap with immersive IT security training aligned with the roadmap. Directly monitor the business's SOC system at Viettel Cyber Security under the guidance of Viettel experts

03 Threat Intelligence

Provide detailed alerts and support to proactively detect and respond to security risks

04 IT Security Monitoring, Management, and Operation

24/7 professional IT security monitoring and protection, complying with international standards, operated by award-winning experts with decades of proven experience.

05 Deployment, Integration, Provision of Professional IT Security Products and Services

Support businesses in choosing and deploying the right IT security products and services perfectly aligned with the roadmap, optimizing investment efficiency by up to 60%.

06 Incident Response

Support from our dedicated incident response team to respond and minimize the time affecting business operations.

07 Compromise Assessment

Identify ongoing or past attacker activity and determine whether an attacker has compromised a computer system or network

08 Building a strong CSMP Community Networking

Through quarterly and annual events and workshops, share knowledge and improve capacity to be ready to deal with IT security threats

Sign up now to receive exclusive privileges for CSMP members

- **Optimized IT Security Roadmap:** A tailor-made roadmap designed exclusively for CSMP members, maximizing investment efficiency by up to 60%.
